So my original plan was to do FLVS for 1st semester, and go back to brick and mortar 2nd semester. However, I haven't understood a single thing in the last 2 modules for Algebra 2. I mean, I can't recall a single thing because I didn't even understand it. So I wouldn't be able to go back to brick and mortar since I would fail the class.

Mastering Assessment: A Self-Service System for Educators, 2/e (hereafter referred to as MA) is a set of 15 booklets intended to be the grist for a wide variety of professional development programs focused on educational assessment. Each of the MA booklets was deliberately written to permit a one- sitting or two- sittings reading by busy educators. The resultant brevity of the MA booklets, coupled with their being provided as separate documents, is intended to provide users of the MA system with considerable latitude in determining how best to use the booklets. A Facilitator's Guide is available to guide educators in using the 15 booklets in their professional development programs and can be downloaded at no additional charge from Pearson's Instructor Resource Center. Mastering Assessment boxset includes:

- Appropriate and Inappropriate Tests for Evaluating Schools
- Assessing Students' Affect
- Assessing Students with Disabilities
- Assessment Bias: How to Banish It
- Classroom Evidence of Successful Teaching
- College Entrance Examinations: The SAT and the ACT
- Constructed-Response Tests: Building and Bettering
- How Testing Can Help Teaching
- Interpreting the Results of Large-Scale Assessments
- Portfolio Assessment and Performance Testing
- Reliability: What Is It and Is It Necessary?
- Selected-Response Tests: Building and Bettering
- The Role of Rubrics in Testing and Teaching
- Test Preparation: Sensible or Sordid?
- Validity: Assessment's Cornerstone

A leading educational thinker argues that the American university is stuck in the past -- and shows how we can revolutionize it for our era of constant change Our current system of higher education dates to the period from 1865 to 1925. It was in those decades that the nation's new universities created grades and departments, majors and minors, all in an attempt to prepare young people for a world transformed by the telegraph and the Model T. As Cathy N. Davidson argues in *The New Education*, this approach to education is wholly unsuited to the era of the gig economy. From the Ivy League to community colleges, she introduces us to innovators who are remaking college for our own time by emphasizing student-centered learning that values creativity in the face of change above all. *The New Education* ultimately shows how we can teach students not only to survive but to thrive amid the challenges to come.

If time could be measured in moments how many moments would we say really made a change in our lives. What happens when we wait to long to tell someone that we see them, admire them, and think their the missing piece in your life's puzzle. It took over a decade of desire before the first letter was ever written expressing the love he shared for her. What happens when an affair goes beyond the realm of physical attraction, and the emotional aspect takes over? Journey into the world of love, desire, and internal conflict as page after page reveals the passion and love that's possible when two people believe! Over a decade of desire, attraction, and fantasy turned into a love that could rival the greatest love story ever told. Some things may make you laugh, something might make you cry, other things may make you say "wow" but its all true every last word of it.
