From The Ashes Of Angels Andrew Collins

Mythology describes how beings of great beauty and intelligence, who served as messengers of gods, fell from grace through pride. These angels, also known as Watchers, lusted after human women, lay with them, and fathered giant offspring called the Nephiiim. Andrew Collins reveals that these angels were flesh-and-blood members of a race who lived in Egypt (prior to the ancient Egyptians), before leaving the region for what is now eastern Turkey.

Provides convincing evidence that angels, demons, and fallen angels were flesh-and-blood members of a giant race predating humanity, spoken of in the Bible as the Nephilim. • Indicates that the earthly paradise of Eden was a realm in the mountains of Kurdistan. • By the author of Gateway to Atlantis. Our mythology describes how beings of great beauty and intelligence, who served as messengers of gods, fell from grace through pride. These angels, also known as Watchers, are spoken of in the Bible and other religious texts as lusting after human women, who lay with them and gave birth to giant offspring called the Nephilim. These religious sources also record how these beings revealed forbidden arts and sciences to humanity--transgressions that led to their destruction in the Great Flood. Andrew Collins reveals that these angels, demons, and fallen angels were flesh-and-blood members of a race predating our own. He offers evidence that they lived in Egypt (prior to the ancient Egyptians), where they built the Sphinx and other megalithic monuments, before leaving the region for what is now eastern Turkey following the cataclysms that accompanied the last Ice Age. Here they lived in isolation before gradually establishing contact with the developing human societies of the Mesopotamian plains below. Humanity regarded these angels--described as tall, white-haired beings with viperlike faces and burning eyes--as gods and their realm the paradise wherein grew the tree of knowledge. Andrew Collins demonstrates how the legends behind the fall of the Watchers echo the faded memory of actual historical events and that the legacy they have left humanity is one we can afford to ignore only at our own peril.

Study of a lost culture, an ancient tribe of supposed super-intelligent beings living on the Iraq-Iranian border who, it is argued, created the basis for western civilisation.

An exploration of the megalithic complex at G ö beklü Tepe, who built it, and how it gave rise to legends regarding the foundations of civilization • Details the layout, architecture, and exquisite carvings at G ö beklü Tepe • Explores how it was built as a reaction to a global cataclysm • Explains that it was the Watchers of the Book of Enoch and the Anunnaki gods of Sumerian tradition who created it • Reveals the location of the remains of the Garden of Eden in the same region Built at the end of the last ice age, the mysterious stone temple complex of G ö beklü Tepe in Turkey is one of the greatest challenges to 21st century archaeology. As much as 7,000 years older than the Great Pyramid and Stonehenge, its strange buildings and rings of T-shaped monoliths--built with stones weighing from 10 to 15 tons--show a level of sophistication and artistic achievement unmatched until the rise of the great civilizations of the ancient world, Sumer, Egypt, and Babylon. Chronicling his travels to G ö beklü Tepe and surrounding sites, Andrew Collins details the layout, architecture, and exquisite relief carvings of ice age animals and human forms found at this 12,000-year-old megalithic complex, now recognized as the oldest stone architecture in the world. He explores how it was built as a reaction to a global cataclysm--the Great Flood in the Bible--and explains how it served as a gateway and map to the sky-world, the place of first creation, reached via a bright star in the constellation of Cygnus. He reveals those behind its construction as the Watchers of the Book of Enoch and the Anunnaki gods of Sumerian tradition. Unveiling G ö beklü Tepe ' s foundational role in the rise of civilization, Collins shows how it is connected to humanity ' s creation in the Garden of Eden and the secrets Adam passed to his son Seth, the founder of an angelic race called the Sethites. In his search for Adam ' s legendary Cave of Treasures, the author discovers the Garden of Eden and the remains of the Tree of Life--in the same sacred region where G ö beklü Tepe is being uncovered today.

Delve into an ancient mystery and witness the unveiling of the most complete and persuasive evidence for the real location of the lost empire of Atlantis. More than two thousand years ago, Plato laid out a series of cryptic clues about the location of Atlantis. Since then, countless experts have tried to crack his code. Today, some experts claim Atlantis lies under the volcanic rocks of Santorini. Others place it in the Bermuda Triangle or off the coast of Africa or say it vanished forever beneath the waves of the Atlantic Ocean. But what if Atlantis is closer than we think? What if we could walk the streets of its ancient capital today? After a twenty-year forensic examination of Plato ' s writings, Peter Daughtrey believes we can do just that. Having matched an unprecedented number of Plato ' s clues to a modern locale, Daughtrey pinpoints the exact location of the once-glittering capital city of Atlantis and outlines the full reach of the empire. Daughtrey ' s quest takes him from the dusty stone quarries of Portugal and the hieroglyphs of Egyptian temples to the newly refurbished museums of Baghdad. Along the way, he unearths long-forgotten, vitally significant artifacts, pieces together sensational evidence of a lost alphabet, and identifies today ' s descendants of this early civilization--and even reveals the location of another undersea settlement from the empire of Atlantis. Hailed as " an intriguing, thought-provoking read " by Graham Hancock, the bestselling author of Fingerprints of the Gods, Atlantis and the Silver City is a detailed and accurate account of an adventurous journey of discovery, told with enthusiasm and verve.

A groundbreaking historical documentation of the secret history of pre-Pharonic Egypt and the race of angels that built it. • By the author of From the Ashes of Angels and Gateway to Atlantis (more than 30,000 copies sold in the United Kingdom). • Unlocks the secrets of how the Great Pyramids and the Sphinx were built. • Explains the traces left by the race of Elder gods that founded ancient Egypt through ancient texts of the Hall of Records. • Proves the foundations of ancient astronomy 10,000 years ago. Hidden deep below Egypt's Giza plateau is perhaps the key to unlocking the mysteries of the Great Pyramid, one of the seven wonders of the world. Built using a technology unequalled even today, the ancient Egyptians claimed they inherited their advanced culture from a race of Elder gods who lived during a previous age known as Zep Tepi, the First Time. In his earlier companion book From the Ashes of Angels, renowned historical writer Andrew Collins provided historical and scientific evidence showing how these Elder gods, who were the flesh and blood members of a race of fallen angels, founded ancient Egypt. Now, in Gods of Eden, he describes the remarkable achievements of their culture. Assembling clues from archaeology, mythology, and religion, Collins shows us how this great society mastered acoustic technology and employed the use of sound to raise heavy objects into the air and pierce holes through solid rock. It was with this technology that they were able to construct gigantic structures that have marveled adventurers and archaeologists worldwide. With findings based on more than 20 years of research and scholarship, Collins reveals the fascinating historical destiny of this culture of fallen angels and the imprints and legacies they left behind at the genesis of civilization.

The Firstborn of God is an in-depth, yet concise, look at the contradictions in the Bible. This book may well have the answers that you have been looking for! Throughout history our religious beliefs have been instrumental in shaping our social and political strictures. Whether we are devout or not, the fundamental philosophies of any give religion will dictate the way in which we interact with each other on a mental, social and political level. Most of the Western world is no exception and has based its theology on a text known as "The Bible." But what is "The Bible"? Is it a collection of scrolls written by a group of old men? Or is it the word of God as so many claim it to be? If the Bible really is the word of God, then it should follow that the chapters and verses will be clear-cut, easily understood and lack ambiguity. But this is not the case. The Bible is ambiguous and many of its texts contradict each other, which in turn implies that the scribes who wrote them had differing views on the divine word of God as well as differing social and political philosophies.

A comprehensive study of the major occult writings on Atlantis • Fully examines the many occult teachings on Atlantis, including those from G. I. Gurdjieff, Madame Blavatsky, Julius Evola, Edgar Cayce, Fabre d ' Olivet, and Dion Fortune • Shows how these writings correlate with the concept of cyclical history, such as the Mayan calendar and 2012, the Age of Aquarius, and the four Yugas • By a renowned scholar, author, editor, and translator of more than 30 books Atlantis has held a perennial place in the collective imagination of humanity from ancient Greece onward. Many of the great minds of the occult and esoteric world wrote at length on their theories of Atlantis--about its high culture, its possible location, its ultimate demise, and their predictions of a return to Atlantean enlightenment or the downfall of modern society. Beginning with a review of the rationalist writings on Atlantis--those that use geographic and geologic data to validate their theories--renowned scholar Joseelyn Godwin then analyzes and compares writings on Atlantis from many of the great occultists and esotericists of the 19th and 20th centuries, including Fabre d ' Olivet, G. I. Gurdjieff, Guido von List, Julius Evola, Edgar Cayce, Dion Fortune, and Ren é Gu é nou, whose writings often stem from deeper, metaphysical sources, such as sacred texts, prophecy, or paranormal communication. Seeking to unravel and explain the histories and interpretations of Atlantis and its kindred myths of Lemuria and Mu, the author shows how these different views go hand-in-hand with the concept of cyclical history, such as the Vedic system of the four Yugas, the Mayan calendar with its 2012 end-date, the theosophical system of root races, and the precession of the equinoxes. Venturing broader and deeper than any other book on Atlantis, this study also covers reincarnation, human evolution or devolution, the origins of race, and catastrophe theory.

Reveals the profound influence of the Denisovans and their hybrid descendants upon the flowering of human civilization around the world • Traces the migrations of the sophisticated Denisovans and their interbreeding with Neanderthals and early human populations more than 40,000 years ago • Shows how Denisovan hybrids became the elite of ancient societies, including the Adena mound-building culture • Explores the Denisovans ' extraordinary advances, including precision-machined stone tools and jewelry, tailored clothing, and celestially-aligned architecture Ice-age cave artists, the builders at G ö beklü Tepe, and the mound-builders of North America all share a common ancestry in the Solutreans, Neanderthal-human hybrids of immense sophistication, who dominated southwest Europe before reaching North America 20,000 years ago. Yet, even before the Solutreans, the American continent was home to a powerful population of enormous stature, giants remembered in Native American legend as the Thunder People. New research shows they were hybrid descendants of an extinct human group known as the Denisovans, whose existence has now been confirmed from fossil remains found in a cave in the Altai region of Siberia. Tracing the migrations of the Denisovans and their interbreeding with Neanderthals and early human populations in Asia, Europe, Australia, and the Americas, Andrew Collins and Greg Little explore how the new mental capabilities of the Denisovan-Neanderthal and Denisovan-human hybrids greatly accelerated the flowering of human civilization over 40,000 years ago. They show how the Denisovans displayed sophisticated advances, including precision-machined stone tools and jewelry, tailored clothing, and horse domestication. Examining evidence from ancient America, the authors reveal how Denisovan hybrids became the elite of the Adena mound-building culture, explaining the giant skeletons found in Native American burial mounds. The authors also explore how the Denisovans ' descendants were the creators of a cosmological death journey and viewed the Milky Way as the Path of Souls. Revealing the impact of the Denisovans upon every part of the world, the authors show that, without early man ' s hybridization with Denisovans, Neanderthals, and other yet-to-be-discovered hominid populations, the modern world as we know it would not exist.

'An energy, a pulse form of quantum physics perhaps, alive at the margins of sleep or madness, and more often in the whispering of a single unwelcome thought.' The Economist According to Islamic tradition, Allah created three types of beings: angels, made of light; humans, made of earth; and jinn, made of smokeless fire. Supernatural, shape-shifting, intelligent and blessed with free will and remarkable powers, jinn have over the ages been given many names - demon, spirit, ghoul, genie, ifrit and shaitan. Neither human nor immortal, they roam the earth inhabiting dark and empty places, luring humans to their deaths or demonically possessing them if harmed or offended. Despite the fact they cannot be seen, jinn are said to be strangely human-like - marrying, bearing children, forming communities and tribes, eating, sleeping, playing and facing judgement like any other human. They are ever-present partners in the human experience, causing endless mischief, providing amazing services and sometimes inducing sheer terror. Believed in by hundreds of millions of people throughout the world and from all faiths, jinn have played a particularly central role in the literature, culture and belief systems of the Middle East and the Islamic world. Legends of the Fire Spirits explores through time and across nations the enduring phenomenon of the jinn. From North Africa to Central Asia, from the Mediterranean to sub-Saharan Africa and beyond, this riveting, often chilling, yet reasoned book draws on long-forgotten ancient testimonies, medieval histories, colonial records, anthropologist's reports and traveller's tales to explore the different types of jinn, their behaviour, society, culture and long history of contact with humankind. It documents their links with famous figures in history such as King Solomon and the Queen of Sheba and illustrates the varied and vivid portrayals of jinn in world literature. In essence Legends of the Fire Spirits demonstrates the colourful diversity of human culture and the durability of faith and is a magnificent and indispensable portrayal of the rich folklore of the Islamic world.

New evidence showing that the earliest origins of human culture, religion, and technology derive from the lost world of the Denisovans • Explains how G ö beklü Tepe and the Giza pyramids are aligned with the constellation of Cygnus and show evidence of enhanced sound-acoustic technology • Traces the origins of G ö beklü Tepe and the Giza pyramids to the Denisovans, a previously unknown human population remembered in myth as a race of giants • Shows how the ancient belief in Cygnus as the origin point for the human soul is as much as 45,000 years old and originally came from southern Siberia Built at the end of the last ice age around 9600 BCE, G ö beklü Tepe in southeast Turkey was designed to align with the constellation of the celestial swan, Cygnus--a fact confirmed by the discovery at the site of a tiny bone plaque carved with the three key stars of Cygnus. Remarkably, the three main pyramids at Giza in Egypt, including the Great Pyramid, align with the same three stars. But where did this ancient veneration of Cygnus come from? Showing that Cygnus was once seen as a portal to the sky-world, Andrew Collins reveals how, at both sites, the attention toward this star group is linked with sound acoustics and the use of musical intervals " discovered " thousands of years later by the Greek mathematician Pythagoras. Collins traces these ideas as well as early advances in human technology and cosmology back to the Altai-Baikal region of Russian Siberia, where the cult of the swan flourished as much as 20,000 years ago. He shows how these concepts, including a complex numeric system based on long-term eclipse cycles, are derived from an extinct human population known as the Denisovans. Not only were they of exceptional size--the ancient giants of myth--but archaeological discoveries show that this previously unrecognized human population achieved an advanced level of culture, including the use of high-speed drilling techniques and the creation of musical instruments. The author explains how the stars of Cygnus coincided with the turning point of the heavens at the moment the Denisovan legacy was handed to the first human societies in southern Siberia 45,000 years ago, catalyzing beliefs in swan ancestry and an understanding of Cygnus as the source of cosmic creation. It also led to powerful ideas involving the Milky Way ' s Dark Rift, viewed as the Path of Souls and the sky-road shamans travel to reach the sky-world. He explores how their sound technology and ancient cosmologies were carried into the West, flowering first at G ö beklü Tepe and then later in Egypt ' s Nile Valley. Collins shows how the ancient belief in Cygnus as the source of creation can also be found in many other cultures around the world, further confirming the role played by the Denisovan legacy in the genesis of human civilization.
