This book constitutes the refereed proceedings of the 7th International Conference on Cloud Computing, Security, Privacy in New Computing Environments, CloudComp 2016, and the First EAI International Conference SPNCE 2016, both held in Guangzhou, China, in November and December 2016.The proceedings contain 10 full papers selected from 27 submissions and presented at CloudComp 2016 and 12 full papers selected from 69 submissions and presented at SPNCE 2016. CloudComp 2016 presents recent advances and experiences in clouds, cloud computing and related ecosystems and business support. SPNCE 2016 focuses on security and privacy aspects of new computing environments including mobile computing, big data, cloud computing and other large-scale environments.

Discover how to set up a sophisticated support center for your business in a matter of a few hours with Salesforce Service Cloud For Dummies. Service executives, managers, support agents, and system administrators will learn through best practices and step-by-step guidelines how to maximize their usage of Service Cloud to give customer service departments a holistic view of the customers they serve. This book covers: Salesforce.com Service Cloud Basics Handling Customer Issues Improving Your Service Organization's Effectiveness Leveraging Your Organizational Knowledge Recognizing When It Takes a Community Measuring Contact Center Performance Designing Your Service Solution with Force.com Improving Contact Center Productivity Improved internal coordination leads to quicker resolution of customers' questions, which can then lead to improved customer satisfaction, which is critical in this age where opinions can be amplified throughout the Internet. Take advantage of this opportunity to be heard above your competition with the help of Salesforce Service Cloud For Dummies.

This book is a part of the Blue Book series “ Research on the Development of Electronic Information Engineering Technology in China ” , which explores the cutting edge of natural language processing (NLP) studies. The research objects of natural language processing are evolved from words, phrases, and sentences to text, and research directions are from language analysis, language understanding, language generation, knowledge graphs, machine translation, to deep semantic understanding, and beyond. This is in line with the development trend of applications. And for another typical NLP application machine translation, from text translation, to voice and image translation, now simultaneous interpretation, progress of technology makes the application of machine translation deeper and wider into diverse industries. This book is intended for researchers and industrial staffs who have been following the current situation and future trends of the natural language processing. Meanwhile, it also bears high value of reference for experts, scholars, and technical and engineering managers of different levels and different fields.

The commercial exploitation of distributed computing technologies is slowly starting to become popular under the general area of cloud computing. These solutions allow selling and buying of resources (i.e., computing, network, software, and data resources) on demand. Existing solutions in this area are diverse, ranging from Infrastructure-- a-Service (IaaS) models via Platform-as-a-Service (PaaS) to Software-as-a-Service (SaaS) models. Although the economics of these services is not yet fully understood and the interoperability between such services is still lacking, a common market for computing services is slowly developing. Such a market would allow buyers and sellers of computing services to trade their excess capacity or make available their capacity at a cost. However, it is still not possible for a market participant to act as a resource provider or seller, or trade based on the current level of demand. Another example of a developing open market is the emergence of Web2.0-based services. These enable consumers to create new services by aggregating services from multiple providers. The benefit of these solutions is that “ value ” can be created by combining services at different prices.

2013 International Conference on Complex Science Management and Education Science, will be held in Kunming, China on 23rd-24th Nov. 2013. This conference is sponsored by Advanced Science Research Center, some universities and some Enterprises. 2013 International Conference on Complex Science Management and Education Science (CSMES2013) will provide an excellent international forum for sharing knowledge and results in theory, methodology and applications of Complex Science Management and Education Science . The conference looks for significant contributions to all major fields of the modern Complex Science Management and Education Science in theoretical and practical aspects. The aim of the conference is to provide a platform to the researchers and practitioners from both academia as well as industry to meet and share cutting-edge development in the field. 2013 International Conference on Complex Science Management and Education Science (CSMES2013) will be published by DEStech Publications. DEStech will have the CDROM indexed in ISI (Institute of Scientific Information) and Google Book Search. DEStech will submit the CDROM to ISTEP and EI for worldwide online citation of qualified papers. We would like to extend our appreciation to all participants in the conference for their great contribution to the success of csmes2013. We would like to thank the keynote and individual speakers and all participating authors for their hard work and time. We also sincerely appreciate technical program committee and all reviewers, whose contributions make this conference possible. Finally, I would like to thank the great support from DEStech Publications, Inc. Prof. Haiyan

This book constitutes the refereed post-proceedings of the 8th International Workshop on Economics of Grids, Clouds, Systems, and Services, GECON 2011, held in Paphos, Cyprus, in December 2011. The 9 revised full papers presented together with 5 work in progress papers were carefully reviewed and selected from 27 papers. The papers are organized in topical sections on market mechanisms and negotiation; cost models, charging, and trading platforms; resource allocation, scheduling, and admission control; and two work in progress sections: risk assessment and economics of cloud services; and cost-aware adoption of cloud services.

In the year 2110, something strange is happening on earth. The color yellow has mysteriously disappeared from the worldtaking with it much of the suns warmth and leaving the earth in peril of freezing. Colonel Aaron Post, a former Air Force pilot and wife, Janice, a retired Attorney General of the United States, are summoned to Washington, DC, by the President. Together with a group of experts, the colonel is tasked with preventing the end of civilization. NASA has determined that there is a cloud of dust spreading between the earth and the sun. Its origins are unknownbut its placement seems to be deliberate. Could there be an extraterrestrial race plotting to invade the earth? Only time will tell. In this novel, a mysterious dust cloud in space obscures the sun and eliminates the color on earth, threatening the existence of all life on the planet.

This book describes new methods and measures which enable ICT service providers and large IT departments to provide secure ICT services in an industrialized IT production environment characterized by rigorous specialization, standardization and division of labor along the complete supply chain. This book is also for suppliers playing their role in this industry. Even more important, user organizations are given deep insight in secure IT production which allows them to make the best out of cloud, mobile and beyond. This book presents a new organization and classification scheme being thoroughly modular and hierarchical. It contains a security taxonomy that organizes all aspects of modern industrialized IT production. The approach takes operational requirements into account and focuses on user requirements, thus facing the reality in the market economy. Despite cost pressure, providers must ensure security by exploiting economies of scale to raise the efficiency also with respect to security. Furthermore, this book describes a wealth of security measures derived from real-world challenges in IT production and IT service management.

This volume contains the papers presented at the Eleventh Flexible Query Answering Systems 2015 (FQAS-2015) held on October 26-28, 2015 in Cracow, Poland. The international conferences on Flexible Query Answering Systems (FQAS) are a series of premier conferences focusing on the key issue in the information society of providing easy, flexible, and intuitive access to information and knowledge to everybody, even people with a very limited computer literacy. In targeting this issue, the Conference draws on several research areas, such as information retrieval, database management, information filtering, knowledge representation, soft computing, management of multimedia information, and human-computer interaction. The Conference provides a unique opportunity for researchers, developers and practitioners to explore new ideas and approaches in a multidisciplinary forum.
