Euromania casino was added to AskGamblers earlier this month. They have two software providers- Skillonnet, which I don't like much, and Next Gen gaming, which I like a lot. I saw that they offer 25 free spins upon registration and it seemed like an offer I wouldn't want to miss.

First Published in 1992. Routledge is an imprint of Taylor & Francis, an informa company.

A Simon & Schuster eBook. Simon & Schuster has a great book for every reader.

Practical, creative and original ideas show teachers how they can make effective use of English-language newspapers in the classroom.

The first comprehensive summary of psychological studies of Arab-Muslim societies, this book examines psychological development through the life-span, describing how traditional patterns appear to be changing in both "modernizing" and "underdeveloping" sectors of Middle Eastern societies. It provides a scholarly account of the region's cultural psychology, and also offers insight into the daily lives of parents, children, and families as they struggle behind and sometimes in the headlines to modernize while conserving valued traditions.

Introduction. 1. Theory. A Model of Identity. Moroccan Culture, Personality, and Identity. 2. A Cultural Geography. 3. Mohammed. 4. Hussein. 5. Rachida. 6. Khadija. 7. Conclusions. Personality Organization. Self Representation. Personality in Middle Eastern Societies. Cultures and Selves. Epilogue. References.

Serf-era and provincial Russia heralded the spectacular turn in cultural history that began in the 1860s. Examining the role of arts and artists in society's value system, Richard Stiles explores this shift in a groundbreaking history of visual and performing arts in the last decades of serfdom. Provincial town and manor house engaged the culture of Moscow and St. Petersburg while thousands of serfs and ex-serfs created or performed. Mikhail Glinka raised Russian music to new levels and Anton Rubinstein struggled to found a conservatory. Long before the itinerants, painters explored town and country in genre scenes of everyday life. Serf actors on loan from their masters brought naturalistic acting from provincial theaters to the imperial stages. Stiles's richly detailed book offers new perspectives on the origins of Russia's nineteenth-century artistic prowess.

In this first in-depth study of how historic scientists and inventors have been portrayed on screen, A Biographical Encyclopedia of Scientists and Inventors in American Film and TV since 1930 catalogs nearly 300 separate performances and includes essays on the screen images of more than 80 historic scientists, inventors, engineers, and medical researchers.

This book challenges the reader to rethink and reimagine what diversity in language education means in transnational societies. Bringing together researchers and practitioners who contributed to the international LINGuistic and Cultural Diversity REinvented (LINC DIRE) project, the book examines four pillars of innovation in language education: the Action-oriented approach, Plurilingualism, Indigenous epistemologies and Technology enhanced learning. The book critically discusses plurilingual pedagogical approaches that draw on learners' linguistic and cultural repertoires to encourage and support the dynamic use of languages in curricular innovation. It is a fundamental resource for language teachers, curriculum designers and educational researchers interested in understanding current thinking on the relevance and benefit of a plurilingual paradigm shift for language education in today's societies. More specifically, this book: Examines the development of plurilingualism and the potential of real-life oriented teaching and learning. Explores the concept of plurilingual and pluricultural competence. Focuses on collaboration and reflection from a humanistic tradition. Explores educational technology and explains the limitations and challenges of adopting ready-made tools. Highlights the iterative, design-based research process that informed the development of LINC DIRE's pedagogical framework and action-oriented scenarios. Introduces practical examples of action-oriented tasks and scenarios, and illustrates the online tool (LITE) in terms of its current functionalities and design. Describes the implementation challenges and opportunities of plurilingual action-oriented tasks and discusses the results of implementation. Finally, the book examines future pedagogical innovation and research directions in order to help readers reflect on the implications of achieving sustainable change in language education. This exciting collection addresses an important question in language education: How can plurilingualism and cultural diversity be harnessed to promote sustainable innovation in language learning and teaching? Readers will find contributions from the diverse authors timely, compelling, and engaging. — Dr. Bonny Norton, FRSC, University Killam Professor, UBC Dept. of Language & Literacy Education, Canada Embracing a design-based research framework, this book offers learners and teachers powerful validation and a rich, relatable and inspiring action-oriented approach to holistic, dynamic, mediated, embodied, true-to-life, plurilingual language teaching and learning. — Dr. Eika Todeva, Professor of Applied Linguistics, MATESOL Program / Advanced Seminar in Plurilingual Pedagogy, SIT Graduate Institute, Washington, D.C. Anyone seeking innovation in Language Education will find in this volume a treasure trove of theoretical, empirical and methodological insights to answer the questions that arose among the 25 co-authors' discussions to rethink language use, language learning, and language teaching. — Dr. Mercedes Bernaus, Emeritus Professor, Universitat Autònoma de Barcelona, Spain This thought-provoking and timely book argues convincingly for the need to reconceptualize innovation in language education in an increasingly diverse world. —Dr. Regine Hampel, Associate Dean (Research Excellence), Faculty of Wellbeing, Education and Language Studies, The Open University, UK
