Content is full of inspiring and actionable forecast information covering womenswear, menswear and youth categories for the apparel and accessory markets.

Fashion Forecasting for Apparel & Accessories

Short-term forecasting, known as fad forecasting, focuses on what trends will emerge across the next 1-2 years, while long-term forecasting looks much further into the future (typically 5-10 years). The latter also contributes to development of the fashion businesses ' strategies, brand image, extending products lines and securing new business.
