The Food Chemicals Codex is the accepted standard for defining the quality and purity of food chemicals. It is frequently referenced by the U.S. Food and Drug Administration and international food regulatory authorities. This First Supplement to the Fifth Edition provides revisions and updates, and reports on changes in tests, monographs, and assays to the Fifth Edition. This supplement features initial information that will benefit producers and users of food chemicals, including processed food manufacturers, food technologists, quality control chemists, research investigators, teachers, students, and those involved in

the technical aspects of food safety.

The fourth edition of the Food Chemicals Codex is the culmination of efforts of the many members, past and present, of the Committee on Food Chemicals Codes (FCC). The current committee, formed in the fall of 1992 at the request of the U.S. Food and Drug Administration, has brought all these efforts to fruition with this edition.
