A memoir. "Em wanted to join but was never selected, yet he would go with to watch." To be left on the side line is not unusual for Em. South Africa, 1970. An autistic boy is born into the Coloured community during Apartheid. Talented and reaching for his goals, Em tries to fit in. He mimics his older brothers but still they do not include him. He wants to belong to a sports club but his elders enforce religion. He longs to explore his environment but the regime prevents it. Whether it

is the games he is unable to join or being left out of conversations, he does not give up and stumbles on. His parents remain the pillars at his side and encourage him to be his peculiar self.

This volume presents research from a variety of perspectives on the enhancement of human intelligence. It is organized around five themes – enhancement via

instruction; enhancement via development (over the life cycle); enhancement over time; enhancement via new constructs; and new directions in enhancement. Three key issues are addressed: First, although most of the scientific research on intelligence has concerned what it is, this volume attends to the consequential societal and economic issue concerns of whether it can be increased, and how. Second, intellectual enhancement is particularly important when targeted to minorities and the poor, groups that have typically performed relatively less well on intelligence and achievement measures. This volume reflects the education community's ongoing interest in understanding, and attempting to close, achievement or test score gaps.

Third, most of the attention to examining intellectual enhancement, and in accounting for and closing the test-score gap, has focused on general cognitive ability. In line with the current emphasis on considering intelligence from a wider perspective, this volume includes constructs such as emotional and practical intelligence in definitions of intellectual functioning. *Extending Intelligence: Enhancement and New Constructs* is an essential volume for researchers, students, and professionals in the fields of educational psychology, intelligence, educational measurement and assessment, and critical thinking.
