This is the standard reference work for general damages in personal injury claims, and essential reading for all those involved in the area of personal injury. The Guidelines are designed to provide a clear and logical framework for the assessment of general damages while leaving the discretion of the assessor unfettered, since every case must depend to a degree on its own facts. They provide an invaluable guide to all those involved in personal injury litigation. As with previous editions, all judges involved in hearing personal injury cases will automatically receive a copy of the book. The Civil Litigation Handbook introduces students to the processes and procedures involved in making and defending civil litigation claims. The text is ideal for students taking the Legal Practice Course or relevant LLB or LLM modules and features case studies on both a personal injury matter and a commercial matter, making it suitable for students with either a high street or a commercial focus. Following the chronological progression of a civil litigation claim, the book offers practical guidance on advising clients whilst ensuring that the principles of the SRA Handbook and Code of Conduct 2011 are maintained. Students on CILEx courses, new trainees in practice and

paralegals will find this practical guidance of use in both their study and their work. Innovative diagrams at the beginning of chapters make clear the way in which the litigation procedure works and help students understand the nature of the process as a whole. Examples provide students with a realistic context for their learning, while issues of cost, best practice, and professional conduct are clearly highlighted. Alternative dispute resolution is given appropriate practical emphasis, and references to the Civil Procedure Rules throughout make sure that students are ready for life in practice. Whiplash injuries can have debilitating consequences for those who suffer them. However, some of the increase in whiplash claims will have been due to fraud or exaggeration. The Government must tighten up the requirements for motor insurance claims and ensure that insurers honour their commitment to reduce premiums. The Government should consider requiring claimants to provide proof that they have either been seen by a doctor or attended A&E shortly after the accident. The MPs also note that their previous recommendation on making the links between insurers and

other parties involved with claims more transparent has been ignored. The absence of comprehensive statistics about road traffic accidents means that it is impossible to relate the increasing number of personal injury claims in recent years to the number of accidents. Data collection about road accidents needs to be improved help to assist detection of fraudulent personal injury claims and help highways authorities improve road safety by targeting spending on accident black-spots. The Committee also supports the proposal for an accreditation scheme for medical practitioners who provide medical reports in relation to whiplash claims. Access to justice could also be impaired by Government proposals to switch whiplash claims between £1,000 and £5,000 to the small claims

Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight

careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.
