Kubernetes and the Mesosphere
DCOS - Kubernetes

Kubernetes is an open source orchestration system for Docker containers. It handles scheduling onto nodes in a compute cluster and actively manages workloads to ensure that their state matches the users declared intentions. On the other hand, Mesosphere is detailed as "Combine your datacenter servers and cloud instances into one shared pool". Mesosphere offers a layer of software that organizes your machines, VMs, and cloud instances and lets applications draw from a single pool of ...
