**Dr. Melissa Vogt** considers the influence of Rainforest Alliance and Fairtrade in coffee farming communities of Costa Rica from 2009-2019. Sustainability certifications schemes are working amongst a range of sustainability efforts, unique by their intra market location. The intentions of each certification scheme must be clarified prior to evaluation and their influence considered amongst contextually specific historic and contemporary considerations, and alongside the range of sustainability efforts. The advantages and disadvantages, opportunities for improvement and how alternative mechanisms might improve upon or complement sustainability certification schemes are explained. An epilogue considers how prioritisation of coffee as a cash crop may align with sustainability. The influence on biodiversity, community health and income, and the possible implication of reduced coffee crop density for consumers, the market and farming landscapes is considered. How sustainability standards might better encourage more ambitious sustainability in farming landscapes is for future consideration.

This book constitutes extended, revised and selected papers from the 21st International Conference on Enterprise Information Systems, ICEIS 2019, held in Heraklion, Crete, Greece, in May 2019. The 26 papers presented in this volume were carefully reviewed and selected for inclusion in this book from a total of 205 submissions. They deal with topics such as data science and databases; ontologies; social networks; knowledge management; software development; human-computer interaction, and multimedia.

This is the first book to focus entirely on viruses in foods. It collates information on the occurrence, detection, transmission, and epidemiology of viruses in various foods. Although methods for bacterial detection in food are available, methods for detection of viruses in food, with the exception of shellfish, are not available. It is important, therefore, to develop methods for direct examination of food for viruses and to explore alternate indicators that can accurately reflect the virological quality of food. This book addresses these issues along with strategies for the prevention and control of viral contamination of food.

This comprehensive subspecialty reference book on NeuroEndocrine Tumor (NET) pathology brings together the diagnostic and clinical expertise of an outstanding team of practicing neuroendocrine pathologists and oncologists. In addition to in-depth coverage of clinico-pathologic aspects of NETs of the various organ systems, the recent histological grading and staging schemes proposed by the North American and European NeuroEndocrine Tumor Societies (NANETS, ENETS), the World Health Organization (WHO) and the American Joint Committee on Cancer (AJCC), this book also focuses on the recent molecular and therapeutic advances in the field of NET pathology and oncology. Neuroendocrine Tumors: Review of Pathology, Molecular and Therapeutic Advances will be an essential reference book for anatomic pathology (histopathology) residents, fellows, surgical pathologists, researchers, oncologists, surgeons and other medical professionals practicing advanced NET Pathology and Oncology in academia, community, private practice and research settings.

The main scientists working with enhancing fungal, bacterial, virus and insect biological control agents on different targets present the latest progress in overcoming the barrier of insufficient virulence. This multi-disciplinary group review their own work and that of others, and describe the approaches being used, the successes and the barriers yet to be overcome. There is no up-to-date equivalent work describing biocontrol, let alone enhanced biocontrol.

This textbook is designed to deliver a comprehensive up-to-date review of all aspects of recurrent laryngeal nerve and superior laryngeal nerve anatomy including surgically important anatomy, key strategic surgical maneuvers, state-of-the-art neural monitoring, preservation of recurrent and superior laryngeal nerves during thyroidectomy and surgical management. Presently, there is no other single book available, that includes all of these surgically important topics explicitly and in-depth. The book is visually oriented with color illustrations and photomicrographs embracing all aspects of recurrent laryngeal nerve anatomy including branching patterns, relationship of the nerve and the inferior thyroid artery and the non-recurrent recurrent laryngeal nerve. A new classification system for recurrent laryngeal nerve anatomy is proposed. Intraoperative neural monitoring of the nerves is also covered in detail along with new horizons and encompass a practical approach to neural monitoring right from set up, actual monitoring and clinical relevance and usefulness of the monitoring data in making surgical decisions. The current status of the field is summarized and placed in context with optimal surgical management of these nerves. All chapters are written by world class US and International experts in anatomy, surgery and nerve monitoring. The Recurrent and Superior Laryngeal Nerves will be of great value to Otolaryngologists and General Surgeons, Endocrine Surgeons, Fellows in Endocrine, Head and Neck Surgery, General Surgery and Otolaryngology residents.

Vascular Liver Disease: Mechanisms and Management covers all of the disease entities that stem from abnormalities that affect the hepatic vasculature. This multi-authored text includes the mechanisms and management of intrahepatic vascular disease, including the most common cause of vascular disease of the liver, cirrhosis. Other less common diseases of the liver vasculature are also covered such as sinusoidal obstruction syndrome (previously known as veno-occlusive disease), portal vein thrombosis, the Budd-Chiari syndrome and congenital vascular malformations. These entities, although rare, are a challenge to physicians and physician scientists. Although many textbooks have been written on the consequences of cirrhosis on the liver vasculature, this is the only volume that focuses on the liver vasculature as a separate entity, providing an innovative approach to liver disease management. Vascular Liver Disease: Mechanisms and Management will be of great value to clinical investigators and basic scientists interested in the liver circulation as well as clinical gastroenterologists and hepatologists, hepatobiliary surgeons and transplant surgeons, and to interventional radiologists with a particular interest in the liver.

Molecular Detection of Animal Viral Pathogens presents expert summaries on state-of-the-art diagnostic approaches for major animal viral pathogens, with a particular emphasis on identification and differentiation at the molecular level. Written by specialists in related research areas, each chapter provides a concise overview of an individual virus

Foundations of Strategy, Canadian Edition is a concise text aimed at both undergraduate and MBA students. With the needs of these students in mind, the authors made sure that the text was written in an accessible style, with a clear, comprehensive approach and sound theoretical depth. An excellent set of current and in-depth Canadian and global cases will show students how to apply the strategy concepts in real-world scenarios. Today's strategy modules are delivered in a wide variety of different formats to a wide range of audiences. Instructors frequently find themselves faced with the challenge of delivering their modules in relatively short time frames to student groups with very diverse educational and employment backgrounds. This text is designed to assist instructors in meeting this challenge by covering the core aspects of strategy as concisely as possible without losing academic depth.
