Those additional specimens, including marine turtles and specimens from the Swan Islands and Cayos Miskitos, not treated by Meyer and Wilson (1973) have resulted in the knowledge that 126 species of those three groups (107 lizard, 2 crocodile, and 17 turtle species) currently are documented to occur in Honduras (with several additional lizard species descriptions in press or in preparation), as opposed to the 59 species recognized by Meyer and Wilson (1973). Thus, those 50 years of

to publish Randy's latest work, a massive compilation on the lizards, crocs and turtles of Honduras, to be titled, appropriately enough, *The Lizards, Crocodiles, and Turtles of Honduras: Systematics, Distribution, and Conservation*.

## *Cover Photos Needed for New Book on Honduran Reptiles ...*

We report the discovery of a population of *Trachemys grayi emolli* in southern Honduras. Verification of the species was based on both morphological and molecular data (ND4, COI, ctyb). We discuss problems that arise from the use of sequences from non-vouchered pet trade and turtle farm samples for inferring phylogenetic relationships and confirming species identifications.

## *Trachemys grayi emolli (Testudines, Emydidae) in Honduras ...*

We analyse phylogeny, systematics and biogeography of slider turtles (*Trachemys* spp.) using sequence data of four mitochondrial genes (3242 bp) and five nuclear loci (3396 bp) of most South American and southern Central American taxa and representatives of northern Central American, West Indian and North American slider species (16 species and subspecies) and allied North American species (genera *Chrysemys*, *Deirochelys*, *Graptemys*, *Malaclemys*, *Pseudemys*). By applying maximum likelihood
