Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies. Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools. It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardized up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook. This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation. Robert J. Blackwell Assistant Secretary for Maritime Affairs

From a journalist on the frontlines of the Students for Fair Admission (SFFA) v. Harvard case comes a probing examination of affirmative action, the false narrative of American meritocracy, and the attack on Asian American excellence with its far-reaching implications—from seedy test-prep centers to gleaming gifted-and-talented magnet schools, to top colleges and elite business, media, and political positions across America. Even in the midst of a nationwide surge of bias and incidents against them, Asians from coast to coast have quietly assumed mastery of the nation's technical and intellectual machinery and become essential American workers. Yet, they've been forced to do so in the face of policy proposals written in the name of diversity excluding them from the upper ranks of the elite. In *An Inconvenient Minority*, journalist Kenny Xu traces elite America's longstanding unease about a minority potentially upending them. Leftist agendas, such as eliminating standardized testing, doling out racial advantages to “preferred” minorities, and lumping Asians into “privileged” categories despite their deprived historical experiences

have spurred Asian Americans to act. Going beyond the Students for Fair Admission (SFFA) v. Harvard case, Xu unearths the skewed logic rippling countrywide, from Mayor Bill de Blasio 's attempted makeover of New York City 's Specialized School programs to the battle over " diversity " quotas in Google 's and Facebook 's progressive epicenters, to the rise of Asian American activism in response to unfair perceptions and admission practices. Asian Americans ' time is now, as they increase their direct action and amplify their voices in the face of mounting anti-Asian attacks. An Inconvenient Minority chronicles the political and economic repression and renaissance of a long ignored racial identity group and how they are central to reversing America 's cultural decline and preserving the dynamism of the free world.

Obsessive self-promotion, an aggressive triggering response, and retaliatory rants. " Both sensitive and incisive, beautifully capturing the paradoxical dynamic of narcissism—that the grandiosity and surrounding bravado belies an underlying fragility and brittleness. " —Kenneth N. Levy, PhD, Associate Professor, Penn State University; Senior Fellow, Personality Disorders Institute, Cornell University Even before Donald Trump entered America 's highest office, an international survey revealed that narcissism is part of the assumed " national character " of Americans. While only a small number actually meet the criteria for Narcissistic Personality Disorder, those exploitive few have a way of gaining center stage in our culture. *Fragile Bully: Understanding Our Destructive Affair With Narcissism in the Age of Trump* looks beyond the sound bites of self-aggrandizing celebrities and selfish tweets to the real problem of narcissism. We see past the solo act to the vicious circles that arise in relationships with a fragile bully, and how patterns like this generate both power and self-destruction. We also look at the problem of Echo, how so many of us get hooked by the narcissist, and how variations on the destructive affair leave both partners dehumanized and diminished. Once we recognize the steps in each dance, we can break the cycle and allow and

Follow two abolitionists who fought one of the most shockingly persistent evils of the world: human trafficking and sexual exploitation of slaves. Told in alternating chapters from perspectives spanning more than a century apart, read the riveting 19th century first-hand account of Harriet Jacobs and the modern-day eyewitness account of Timothy Ballard. Harriet Jacobs was an African-American, born into slavery in North Carolina in 1813. She thwarted the sexual advances of her master for years until she escaped and hid in the attic crawl space of her grandmother's house for seven years before escaping north to freedom. She published an autobiography of her life, *Incidents in the Life of a Slave Girl*, which was one of the first open discussions about sexual abuse endured by slave women. She was an active abolitionist, associated with Frederick Douglass, and, during the Civil War, used her celebrity to raise money for black refugees. After the war, she worked to improve the conditions of newly-freed slaves. As a former Special Agent for the Department of Homeland Security who has seen the horrors and carnage of war, Timothy Ballard founded a modern-day "underground railroad" which has rescued hundreds of children from being fully enslaved, abused, or trafficked in third-world countries. His story includes the rescue and his eventual adoption of
