The Good The Motorola V325 promises a speakerphone, and it's the first cell phone to use Verizon's new GPS navigation system for location-based services.. The Bad The Motorola V325 is hobbled by a ...

A practical guide to learning ASL that emphasizes key vocabulary, expressions, and language in context.

Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. BlackwellAssistant Secretary for Maritime Affairs

Reinforces and expands on vocabulary, grammar and language functions taught in the classroom.

What would you do if you discovered your whole life to be a lie? Daniel Henstock thinks he’s an ordinary schoolboy but on his sixteenth birthday his world is turned upside down. He is the world’s first one-hundred percent genetically-engineered human - assigned the codename Tiberius - and Gregory Dryden, the man responsible, wants him back so that he can continue his deadly experiments. Running for his life, Daniel flees to New York and is forced to go ‘off-grid’. In this near-future America, where the security-obsessed authorities require citizens to carry DNA cards, Daniel meets the feisty and beautiful Eleanor. But by falling for her, Daniel also puts her in terrible danger. Daniel pursues the facts about his origins but is hunted by an agent sent by Dryden to bring him to heel. Can Daniel find out the truth whilst trying to evade those who think they own him? As his enemies close in Daniel must draw on resources he never knew he had to win his freedom - but in doing so he may be walking into a deadly trap ... TIBERIUS FOUND is the first instalment in a thrilling series - The Emperor Initiative - that introduces an engaging new hero that will appeal to fans of Alex Rider and Jason Bourne.

Deep coverage and rigorous examination of international corporate finance Multinational Finance offers an advanced exploration of international corporate finance concepts and operations. Despite its status as one of the most rigorous texts on the topic, this book remains accessible and readable without sacrificing depth of coverage. Sidebars, key terms, essays, conceptual questions, and problems with solutions help aid in the learning process, while suggested readings and PowerPoint handouts reinforce the material and offer avenues for further exploration. This new sixth edition includes Excel templates that allow students to use real-world tools in a learning environment, and the modular structure facilitates course customization to individual objectives, interests, and preparatory level. The emphasis is on the basics of financial management, but coverage includes unique chapters on treasury management, asset pricing, hedging, options, and portfolio management in addition to traditional finance topics. International finance is a diverse field with myriad specialties and a vast array of possible interests. This book allows students to view the field through the lens of a financial manager with investment or financial options in more than one country to give them a practical feel for real-world application. Understand the nature and operations of international corporate finance Evaluate opportunities, costs, and risks of multinational operations See beyond the numbers and terminology to the general principles at work Learn the markets, currencies, taxation, capital structure, governance, and more Comprehensive, adaptable, and rigorously focused, this book gives students a solid foundation in international corporate finance, as well as a sound understanding of the tools and mechanics of the field. Designed for MBA and advanced undergraduate courses, Multinational Finance provides the deep coverage so essential to a solid education in finance.

'Janey is like a whirlwind of selflessness. A beautiful spirit in a beautiful country doing a beautiful thing. I encourage my children to be more 'Janey'. With more positive spirits like Janey, the world would be a better place.' - Ben Fogle In 2014 and in her mid-twenties, Janey Lowes had been a vet for just two years when she left her home in County Durham and went travelling. Visiting Sri Lanka, she was horrified to see the state of so many of the island's dogs, in particular the three million strays. Over 5,000 miles from home, Janey decided there and then that she was going to move to the island indefinitely and do everything within her power to help them. She raised £10,000 to get started, setting up a charity called WECare Worldwide, and began work. Frightened, determined and excited all at the same time, she found a local who was willing to work with her and began scouring the streets for dogs in need. Some she patched up as best she could at the roadside, others she brought back and treated in a make-shift surgery she had cobbled together in her new home. With very little equipment, she and her small team came up with new and ingenious ways to treat the animals. In this highly inspiring and heartfelt book full of challenges and adventure, Janey introduces us to her world and the tireless work she carries out. As she says, 'I feel as though all these dogs are my dogs and I have a responsibility to them.' In it, we meet many of the colourful characters who have come to offer help, along with innumerable street dogs who have suffered all sorts of trauma and injury, only to be scooped up by Janey and her team and saved.
