Written and edited by leading international authorities in the field, this book provides an in-depth review of knowledge of tuberculosis of the central nervous system, with emphasis on clinical, diagnostics, and therapeutic features. Tuberculosis, one of the most lethal diseases in human history, still poses a serious threat in the world together with economic and social problems, although a great progress in the fight against this infectious disease in the last century. It covers the full range of tuberculosis of central nervous system and the chapters are organized into six sections: (1) the cranial; (2) the spinal; and (3) the peripheral portions of the nervous system; followed by (4) a section on the laboratory studies in tuberculosis; (5) a section on medical and surgical therapy; and (6) further insights into tuberculosis. This comprehensive reference book will be an ideal source for neurosurgeons, neurologists and specialists upon infectious diseases seeking both basic and more sophisticated information and surgical procedures relating to the complications associated with tuberculosis involving the spine, brain and peripheral nerves.

Based on the 4th edition of the renowned textbook of the same name, this softcover manual focuses on the information necessary to make clinical decisions in the ICU. It begins with a crucial section on responding to emergency situations in the ICU. It proceeds to cover the most relevant clinical infomation in all areas of critical care including critical care monitoring, techniques and procedures, essential physiologic concers, shock states, pharmacology, surgical critical care, and infectious diseases. The manual also contains thorough reviews of diseases by organ system: cardiovascular diseases, respiratory disorders, neurologic and gastrointestinal disorders, renal, endocrine, skin and muscle diseases, and hematologic/ oncologic diseases. This essential new resource is written in an easy-to-read style that makes heavy use of bulleted lists and tables and features an all-new full color format with a color art program. All critical care providers will find this a useful clinical resource.

The API (Association of Physicians of India) Textbook of Medicine consists of 28 sections across two comprehensive volumes covering a wide range of medical disorders. Fully revised and with 1588 images, illustrations and tables, this new edition has many new chapters on topics including nanotechnology and nano-medicine, and clinical approach to key manifestations. Each section is dedicated to a different medical phenomenon, including clinical pharmacology, endocrinology, dermatology, infectious diseases and nutrition. Also included is online access to teaching modules for teachers and students, questions and answers, an atlas/image bank, echocardiography and video EEG and common medical procedures with voice over.
