This book gathers papers presented at the 11th International Conference on Construction in the 21st Century, held in London in 2019. Bringing together a diverse group of government agencies, academics, professionals, and students, the book addresses issues related to construction safety, innovative technologies, lean and sustainable construction, international construction, improving quality and productivity, and innovative materials in the construction industry. In addition, it highlights international collaborations between various disciplines in the areas of construction, engineering, management, and technology. The book demonstrates that, as the industry moves forward in an ever-complex global economy, multi-national collaboration is crucial, and its future growth will undoubtedly depend on international teamwork and alliances.

Human Resource Strategy provides an overview of the academic and practitioner responses to these and other questions. Applying an integrative framework, the authors review twenty years' worth of empirical and theoretical research in an attempt to reconcile often-conflicting conceptual models and competing empirical results. The authors present much of the relevant research in the context of the critical strategic decisions that executives must actually make with regard to human resource investments and deployments. As a result, often complex theoretical models and scientific findings are presented such that they are not only understandable but also highly relevant to non-research-oriented practitioners.
