Riveted The Science Of Why

—Jeanette Bicknell, Ph.D.,

author of Why Music Moves Us

“Riveted lives up to its title as a compelling investigation into the properties of our lives, the origins of which can be traced to the kind of species we are: why we plan, imagine, invent imaginary worlds, weep and laugh in chorus, delight in puzzles and incongruities, respond to patterns, rhythms, and repetitions, cluster in groups and create outsiders, seek attractive partners, and crave status. To a better understanding of ...

**Davies**

The past 20 years have seen a remarkable flourishing of scientific research into exactly these kinds of questions. Professor Jim Davies' fascinating and highly accessible book, *Riveted*, reveals the evolutionary underpinnings of why we find things compelling, from art to religion and from sports to superstition. Compelling things fit our minds like keys in the ignition, turning us on and keeping us running, and yet we are

Davies Publisher & Year: St.  
Martin's Press; 2014 REVIEW:

“Understanding  
compellingness and how it  
works requires some  
understanding of our brains  
and how they were shaped by  
evolution.” -J. Davies What  
makes something compelling?  
Riveted seeks an answer to  
that question.
