Chess enthusiast Herman Tolbert Sr takes three of the four elements of chess (space, time, force) and parallels a one to one mapping that relates Geometry, Physics and Mathematics in a unique theme he terms "Corridors". Compiling over-the-board tournament experience along with online worldwide games as well as friendly pick-up games, Corridors is a repeated process which eventually zones in on the King or significant material which has game winning advantages. This work hopes to demonstrate Mr. Tolbert's classroom teaching skills and his keen analytical ability to breakdown the complex into simpler form(s) Corridors is a combination of whole or partial rank(s), file(s) and square(s) which are controlled to a lasting degree which yield advantageous results. Many chess concepts are conveyed by novice to Grandmasters, but this unique work though not for the very beginner can be applied by the many eager-to-improve players; no matter the skill level. It is with this spirit that Mr. Tolbert wishes to share what he feels is a path of enlightenment, whose fruits of labor is a growth in understanding chess which can only lead to more victories.

Homer's King Nestor of "sandy Pylas" passes from legend into history in this first volume of the report of excavations on a hill called Englianos in Messenia, conducted by the Archaeological Expedition of the University of Cincinnati. The palace with its contents and the surrounding lower town indicate that this was an administrative center and the capital of a prosperous Mycenaean kingdom. The name Pylas appears on more than fifty tablets, and there can be no doubt that this was the Messenian abode of the Nestor of Greek tradition. Destroyed by fire at the end of the 13th century B.C., and never reoccupied, the palace has lain for more than 3,000 years in ruins. During the annual campaigns of the Expedition between 1952 and 1964, it emerged as a complex of four separate structures of considerable size. The floors, stumps of wall bearing plaster with painted decorations, doorways, and other evidence helped to identify gateways, courts, porticoes, vestibules, corridors, a great throne room, storerooms, a wine magazine, pantries filled with pottery, a bathroom, stairways, and a repair shop. Except for the tablets, seals, and frescoes, which will be described in other volumes, all the finds are recorded and illustrated with plans, drawings, and photographs. Originally published in 1966. I am a first year at the prestigious Kuzusaki High school, a nationally famous school that hides a mystery I have sworn to unravel: a mystery of the day my city burned, and ash fell like snow. One might even think I'm gathering some sort of harem with the echhi situations I keep getting caught up in, and women I end up helping. And so starts my high school life, a psychological thriller filled with supernatural occurrences that have bled into the normal world after being concealed in the shadows for an eternity.
