With U.S. intelligence agencies wracked by internal power struggles and paralyzed by bureaucracy, the president has been forced to establish his own clandestine group--Covert-One. It's activated only as a last resort, when the threat is on a global scale and time is running out. THE UTOPIA EXPERIMENT When Dresner Industries unveils the Merge, a device that is destined to revolutionize the world and make the personal computer and smarphone obsolete, Covert-One operative Colonel Jon Smith is assigned to assess its military potential. He discovers that enhanced vision, real-time battlefield displays, unbreakable security, and near-perfect marksmanship are only the beginning of a technology that will change the face of warfare forever--and one that must be kept out of the hands of America's enemies at all costs. Meanwhile, in the mountains of Afghanistan, CIA operative Randi Russell encounters an entire village of murdered Afghans--all equipped with enhanced Merge technology that even the Agency didn't know existed. As Smith and Russell delve into the circumstances surrounding the Afghans' deaths, they're quickly blocked by someone who seems to have access to the highest levels of the military--a person that even the president knows nothing about. Is the Merge really as secure as its creator claims? And what secrets about its development is the Pentagon so desperate to hide? Smith and Russell are determined to learn the truth. But they may pay for it with their lives . . .

Risk is everywhere - from genetically modified crops, dams, and stem-cell therapy to heartbreak, online predators, inflation, and robbery. This Very Short Introduction examines what science has learned about how people deal with risks, what we can learn through decision theory, and how we can evaluate risk in our own lives.

Robert Browning (1812 \u2022 1889) was one of the defining figures of the Victorian age. Famous in his lifetime for his elopement and marriage to Elizabeth Barratt, his critical reputation grew steadily in the years following her early death. Browning's mastery of dramatic verse was evident throughout his career, from such chillingly unforgettable monologues as "My Last Duchess" and "Porphyria" to the mature work included in his collection Dramatis Personae. This selection, chosen by leading scholars, reveals the innovation, complexity and profound psychological insight that have ensured Browning's enduring reputation and his continuing appeal to readers today. Browning: Selected Poems results from a completely fresh appraisal of the canon, text and context of the writer's work. The poems are presented in the order of their composition and in the text in which they were first published, giving a unique insight into the development of Browning's art. An introduction and chronology offer useful background material, whilst annotations and headnotes provide details of composition, publication, sources and contemporary reception. This authoritative yet accessible selection should become the first point of reference for scholar, student and general reader alike.

[Siren Epic Romance, ManLove: Erotic Alternative Paranormal Romance, M/M, with M/M/M, shape-shifters, HEA] Salvador is an ancient vampire who has come to America to settle a score with Kraven, the master vampire of Hamilton County. What he hadn't expected was to find his mates. John Freedman, formerly the leader of the Death Squad, must save Omar from the government, who is holding him in the last remaining detention center. When a stranger shows up claiming he wants to help, Freedman isn't so sure he wants the man anywhere near him--especially considering the fact that Salvador is a vampire. Omar Reed is in a truly messed-up situation. His parents had been less than understanding, and then his alpha knocked him down to juvenile status, an insult to any changeling breed. Worse yet, Omar was captured and experimented on by a sadistic scientist. As the war against nonhumans becomes critical, the three spend most of their time just trying to stay alive, but there's plenty of chemistry between them to take up the rest. Can they find enough common ground when their clothes are on to last forever? When Dorian is critically wounded, no one is sure if he will live or die, until Salvador offers a choice that just might send Rick over the edge. NOTE! You are purchasing Siren's newest imprint, the Siren Epic Romance collection. This is Book 6 of 7 in the Rise of the Changelings series. The series shares an overall story arc with many crossover characters playing major roles in each book. These books are not stand-alone and should be read in their numbered order. \*\* A Siren Erotic Romance

Despite nearly universal critical acclaim for Robert Penn Warren's later poetry, much about this large body of work remains unexplored, especially the psychological sources of these poems' remarkable energy. In this groundbreaking work, Warren scholar Joseph R. Millichap takes advantage of current research on developmental psychology, gerontology, and end-of-life studies to offer provocative new readings of Warren's later poems, which he defines as those published after Audubon: A Vision (1969). In these often intricate poems, Millichap sees something like an autobiographical epic focused on the process of aging, the inevitability of death, and the possibility of transcendence. Thus Warren's later poetry reviews an individual life seen whole, contemplates mortality and dissolution, and aspires to the literary sublime. Millichap locates the beginning of Warren's late period in the extraordinary collection Or Else: Poem/Poems 1968--1974, basing his contention on the book's complex, indeed obsessive sequencing of new, previously published, and previously collected poems unified by themes of time, memory, age, and death. Millichap offers innovative readings of Or Else and Warren's five other late gatherings of poems -- Can I See Arcturus from Where I Stand?: Poems 1975; Now and Then: Poems 1976--1978, winner of the Pulitzer Prize; Being Here: Poetry 1977--1980; Rumor Verified: Poems 1979--1980; and Altitudes and Extensions 1980--1984. Among the autobiographical elements Millichap brings into his careful readings are Warren's loneliness in these later years, especially after the deaths of family members and friends; his alternating feelings of personal satisfaction and emptiness toward his literary achievements; and his sense of the power, and at times the impotence, of memory. Millichap's analysis explores how Warren often returned to images and themes of his earlier poems, especially those involving youth and midlife, with the new perspective given by advancing age and time's passage. Millichap also relates Warren's work to that of other poets who have dealt profoundly with memory and age, including Robert Frost, T. S. Eliot, Thomas Hardy, and, at times, John Milton, William Wordsworth, and the whole English and American nineteenth-century Romantic tradition. An epilogue traces Warren's changing reputation as a poet from the publication of his last volume in 1985 through his death in 1989 and the centennial of his birth in 2005, concluding persuasively that the finest of all of Warren's literary efforts can be found in his later poetry, concerned as it is with the work of aging and the quest for transcendence.

The RIVER CAFE COOKBOOKS are a publishing phenomenon, with over a quarter of a million sold. Following a successful pilot on BBC, Rose Gray and Ruth Rogers were asked by Channel 4 to make a series in which they showed how to make some of their fantastic dishes and explained why they cook how they do. This unique book, which is photographed at both the River Cafe and in Italy, complements the existing cookbooks, contains all the recipes shown in the series 1 and 2 of ITALIAN KITCHEN and provides a platform for the authors to explain the philosophy behind their food with passion and verve.

Covering a series of important topics which are of current research interest and have practical applications, this book examines all aspects of risk analysis and hazard mitigation, ranging from specific assessment of risk to mitigation associated with both natural and anthropogenic hazards.

Reinsurance is an important production factor of non-life insurance. The efficiency and the capacity of the reinsurance market directly regulate those of insurance markets. The purpose of this book is to provide a concise introduction to risk theory, as well as to its main application procedures to reinsurance. The first part of the book covers risk theory. It presents the most prevalent model of ruin theory, as well as a discussion on insurance premium calculation principles and the mathematical tools that enable portfolios to be ordered according to their risk levels. The second part describes the institutional context of reinsurance. It first strives to clarify the legal nature of reinsurance transactions. It describes the structure of the reinsurance market and then the different legal and technical features of reinsurance contracts, known as reinsurance "treaties" by practitioners. The third part creates a link between the theories presented in the first part and the practice described in the second one. Indeed, it sets out, mostly through examples, some methods for pricing and optimizing reinsurance. The authors aim is to apply the formalism presented in the first part to the institutional framework given in the second part. It is reassuring to find such a relationship between approaches seemingly abstract and solutions adopted by practitioners. Risk Theory and Reinsurance is mainly aimed at master's students in actuarial science but will also be useful for practitioners wishing to revive their knowledge of risk theory or to quickly learn about the main mechanisms of reinsurance.

Four outstanding novels set in the Old West, featuring the "smart and resourceful" gun-slinging duo Virgil Cole and Everett Hitch--from the New York Times bestselling author of the Spenser, Jesse Stone, and Sunny Randall novels. ("Publishers Weekly) Includes: Appaloosa Resolution Brimstone Blue-Eyed Devil

Pulitzer Prize-winning author John McPhee continues his Annals of the Former World series about the geology of North America along the fortieth parallel with Rising from the Plains. This third volume presents another exciting geological excursion with an engaging account of life"past and present"in the high plains of Wyoming. Sometimes it is said of geologists that they reflect in their professional styles the sort of country in which they grew up. Nowhere could that be more true than in the life of a geologist born in the center of Wyoming and raised on an isolated ranch. This is the story of that ranch, soon after the turn of the twentieth century, and of David Love, the geologist who grew up there, at home with the composition of the high country in the way that someone growing up in a coastal harbor would be at home with the vagaries of the sea.
