What a place it was, that dark little house that was two rooms up and two down ... I don't remember to this day where we all slept, though there was a funeral now and then to thin us out. This is the powerful story of two hard-driven men — one a celebrated English novelist, the other a successful Irish entrepreneur — and of their sons, in whom are invested all their fathers' hopes and ambitions. Oliver Essex and Rory O'Riorden grow up as friends, but in the years after the Great War their fathers' lofty plans have unexpected consequences.

The search for a missing girl leads private investigators Elvis Cole and Joe Pike into the nightmarish world of human trafficking in this #1 New York Times bestseller from Robert Cray. When Nita Morales hires Elvis Cole to find her missing daughter, she's sure it's a ruse orchestrated by the girl and her boyfriend. She's wrong. They've been taken by bajadores—border bandits who prey on the innocent by buying, selling, and disposing of victims like commodities. Cole and Joe Pike start an undercover investigation to find the couple, but their plan derails when Cole disappears, leaving Pike to burn through the murderous world of human traffickers to find his friend as well as the missing young people. But he may already be too late...

Myth in the Ancient World provides a complete introduction to this important field of study. It contains a selection of readings from ancient texts and a comprehensive glossary designed for readers meeting the people and places of the ancient world for the first time. The book asks what a myth is and how it differs from other narratives, such as legends and folktales. It also looks at interpretations of meaning in mythology. The focus is on Ancient Greek myth, but Roman reinterpretation of Greek stories and the invention of Roman myth are also discussed. Texts from Egypt, the peoples of Mesopotamia, and the Jewish traditions found in the Bible broaden the context and deepen our understanding of myth. The book examines the relevance of key themes to the cultures in which the myths arose or in which they were adapted and retold. Looking at the reflection of the ancient world through myth helps us to identify important religious, social and political aspects of ancient cultures.

In times of suffering, simplistic answers ring empty and hollow. But Henri Nouwen, beloved spiritual thinker and author, offers real comfort in the concrete truth of God's constancy. Nouwen suggests that by greeting life's pains with something other than despair, we can find surprising joy in our suffering. He suggests that the way through suffering is not in denial, but rather in living fully in the midst of the trials life brings our way. Hardcover ISBN 0-8499-1711-5

Solar power's detractors have been proclaiming that the collapse of solar panel manufacturer Solyndra proves solar is just a hippie pipe dream. But as Danny Kennedy points out, Solyndra's downfall actually proves the opposite: the company failed because it wasn't able to compete in a red-hot industry, not because solar isn't ready for prime time. In this succinct, hard-hitting book, Kennedy proves that solar can save money, create jobs, and protect the environment - and only politics and perception stand in its way.Signs of solar's ascendancy are everywhere. The industry employs 100,000 people in the United States, twice as many as in 2009 and twice the number of coal miners. In 2011, Warren Buffet invested 2 billion dollar in a solar farm, and around the time Solyndra went bust, General Electric bought a start-up solar manufacturer, announcing, "By 2020 this is going to be at least a 1 billion dollar product line." Production of solar-generated electricity rose by 45 percent in the first three quarters of 2010, while electricity from natural gas rose only 1.6 percent and coal declined by 4.2 percent.But powerful forces are still arrayed against solar power, and that's why Kennedy wrote this book. We need a rooftop revolution to break the entrenched power of the coal, oil, nuclear, and natural gas industries (which Kennedy calls King CONG) and their bought-and-paid-for allies. Kennedy systematically refutes the lies spread by CONG - that solar is expensive, inefficient, and unreliable; that it is kept alive only by subsidies; that it can't be scaled up; and many other untruths - and shows that the solar industry can become a far greater source of jobs than it already is. Praising the pioneers who are pushing solar forward, Kennedy also decries the rampant political pandering that keeps us dependent on dirty and dangerous forms of energy. Now is the time to move away from the declining sources of the past and unleash the unlimited potential of the sun.

The author humorously recounts her life growing up in the South, and comments on southern men, women, and traditions
