Just like any consumer satellite system, you will need an LNB at the dish to convert the 10GHz Ku band signals down to L Band which can then be decoded by the satellite receiver. Whilst any modern Ku band satellite LNB will receive the Oscar 100 signals, particularly the 2Ms beacon, it is recommended that you use a Phase Lock Loop LNB.

Receiving-Oscar-100-DATV-signals-BATC-Wiki

Even though the name says full version, this is purely a satellite receiver, it doesn't do media streaming or connect to the internet, but then it doesn't charge you for those features either, which will presumably please the many people who just want a plain vanilla satellite receiver and see no reason to pay for bells and whistles they neither need nor want.

Best-Satellite-Receiver-UK-(MUST-READ-FULL-REVIEW)

From time to time, your satellite dish may stop receiving a signal, this is commonly caused by bad weather or a new obstruction blocking the signal meaning your dish needs to be re-aligned. Over time, parts of your satellite dish such as the LNB or connections can become faulty either through water damage or simple wear and tear.
