A concise and engaging investigation of six interpretations of quantum physics. Rules of the quantum world seem to say that a cat can

be both alive and dead at the same time and a particle can be in two places at once. And that particle is also a wave; everything in the quantum world can be described in terms of waves—or entirely in terms of particles. These interpretations were all established by the end of the 1920s, by Erwin Schrödinger, Werner Heisenberg, Paul Dirac, and others. But no one has yet come up with a common sense explanation of what is going on. In this concise and engaging book, astrophysicist John Gribbin offers an overview of six of the leading interpretations of quantum mechanics. Gribbin calls his account “agnostic,” explaining that none of these interpretations is any better—or any worse—than any of the others. Gribbin presents the Copenhagen Interpretation, promoted by Niels Bohr and named by Heisenberg; the Pilot-Wave Interpretation, developed by Louis de Broglie; the Many Worlds Interpretation (termed “excess baggage” by Gribbin); the Decoherence Interpretation (“incoherent”); the Ensemble “Non-Interpretation”; and the Timeless Transactional Interpretation (which theorized waves going both forward and backward in time). All of these interpretations are crazy, Gribbin warns, and some are more crazy than others—but in the quantum world, being more crazy does not necessarily mean more wrong.

Consciousness is a subject that both baffles

and fascinates many people at the same time. In this book, author Terry Edwards explores the nature of Consciousness as a universal metaphysical phenomenon and describes how it affects us in this materialistic world. The idea of us living in a Virtual Reality is looked at and discussed, as is the idea of how systems and numbers influence us all.

This book examines four conspiracy narratives from Mexico that push the boundaries of conspiracy research in a new direction. They include narratives about Lee Harvey Oswald's visit to Mexico City, shortly before he apparently assassinated JFK, and street gangs across borders and how some of our worst fears are projected into them. Mexico is a fertile terrain for conspiracy theories due to its complex social environment and its proximity to the United States, which not only made it a strategic platform during the Cold War but also today's land of bad hombres that according to Donald Trump should be fended off with a wall. Conspiracy theories are always narrative in nature, telling us about the state of the world and the actors behind such states of affairs. This narrativity tends to be so enthralling that they have increasingly become the substance of entertainment and even politics. This volume analyses Mexican conspiracy narratives, explaining how they produce meaning in a variety of different social and

political contexts. This book will be of interest to researchers of conspiracy theories, crime and its representations, Mexican politics and society, and US–Latin American relations.

Bestselling author and peak performance expert Steven Kotler decodes the secrets of those elite performers--athletes, artists, scientists, CEOs and more--who have changed our definition of the possible, teaching us how we too can stretch far beyond our capabilities, making impossible dreams much more attainable for all of us. What does it take to accomplish the impossible? What does it take to shatter our limitations, exceed our expectations, and turn our biggest dreams into our most recent achievements? We are capable of so much more than we know--that's the message at the core of *The Art of Impossible*. Building upon cutting-edge neuroscience and over twenty years of research, bestselling author, peak performance expert and Executive Director of the Flow Research Collective, Steven Kotler lays out a blueprint for extreme performance improvement. If you want to aim high, here is the playbook to make it happen! Inspirational and aspirational, pragmatic and accessible, *The Art of Impossible* is a life-changing experience disguised as a how-to manual for peak performance that anyone can use to shoot for the stars . . . space-suit, not included.

#1 NEW YORK TIMES BESTSELLER \* "Brilliant . . . a celebration of human ingenuity [and] the purest example of real-science sci-fi for many years . . . utterly compelling."--The Wall Street Journal The inspiration for the major motion picture Six days ago, astronaut Mark Watney became one of the first people to walk on Mars. Now, he's sure he'll be the first person to die there. After a dust storm nearly kills him and forces his crew to evacuate while thinking him dead, Mark finds himself stranded and completely alone with no way to even signal Earth that he's alive--and even if he could get word out, his supplies would be gone long before a rescue could arrive. Chances are, though, he won't have time to starve to death. The damaged machinery, unforgiving environment, or plain-old "human error" are much more likely to kill him first. But Mark isn't ready to give up yet. Drawing on his ingenuity, his engineering skills--and a relentless, dogged refusal to quit--he steadfastly confronts one seemingly insurmountable obstacle after the next. Will his resourcefulness be enough to overcome the impossible odds against him?

NAMED ONE OF PASTE'S BEST NOVELS OF THE DECADE "A hugely entertaining novel [that] reads like a rocket ship afire . . . Weir has fashioned in Mark Watney one of the most appealing, funny, and resourceful characters in recent fiction."--Chicago Tribune "As gripping as they come . . . You'll be rooting for Watney the whole way, groaning at every

We sold 347 eBooks in January of 2011. In just six months, by July 2011, we were selling 65,000 eBooks a month. From that modest beginning, by 2011's end, we had sold over 400,000 eBooks. This book will give you the details on how we did that and built a seven-figure indie publishing house in just two years. Whether you have been published by a New York publisher, an independent press, an ePublisher, self-published or considering all of your options, this book contains all the information you need to make an informed decision about your career as an author in today's fast moving digital world. We start out with content and theory, giving you a feel for where the industry has been and where it is going. We cover the various types of publishing, goal setting and help you find where you fit in the 3 P's (Product, Platform and Promotion). From there we go into the digital process and the nuts and bolts of covers, editing and uploading. Finally we cover pre and post publication strategies. Everything from creating your own unique branding plan, social media and marketing, pricing, understanding the market, metadata and discoverability. All of which is your roadmap to being a successful author regardless of your path to publication. Its a great time to be an author. Lead, follow or

Over an entire year, with her bus pass, pens and paper in hand, poet Marcia Mae Nelson Pedde travels by local transit all around her new hometown. Quite simply, she falls in love with the city of Victoria, British Columbia, Canada. From elucidating the incredible beauty that is Victoria to revealing the simplicity and the elegance at its very heart, Marcia expresses her admiration for both the people who call this place home, and those who journey here from all over the globe to experience this City of Gardens. Marcia records her own personal perceptions of it all as she also journeys ever deeper into herself. In both verse and prose, there is beauty, poetry and play between these covers. Come, travel through the city that is Victoria. Learn to love it – one story and one poem at a time. This book is available in paperback as well as Kindle and e-pub versions.
