realising that tying a rock to a string would mean we could navigate the entire world. Or thinking disease was caused by weird smells. Fascinating and hilarious, *How To Invent Everything* is an epic, deeply researched history of the key technologies that made each stage of human history possible (from writing and farming to buttons and birth control) - and it's as entertaining as a great time-travel novel. So if you've ever secretly wondered if you could do history better yourself, now is your chance to find out how.

This manual is aimed at road safety practitioners who want to implement a helmet use program, in order to reduce the high number of fatalities and injuries that are associated with increasing use of two-wheelers in many countries. Although primarily intended for low-income and middle-income countries, the manual is applicable to countries that have different levels of helmet use. The book provides practical, step-by-step guidance on the design, implementation and evaluation of a helmet use program, as well as practical advice on its marketing and publicity. The technical processes described are illustrated using case studies from both developed and developing countries.
