An animated tale of talking dogs, The Plague Dogs is decidedly not for kids. I know any number of adults whose psyches it would destroy. It's written and directed by Martin Rosen, based on the novel by Richard Adams, whose earlier novel, Watership Down, Rosen also adapted for the screen (to rather poor effect, I'm afraid).

Rowf, a shaggy black mongrel, and Snitter, a black-and-white fox terrier, are among dozens of animals being cruelly held in a testing facility in North West England. When one of the handlers fails to close Rowf's cage properly, the two dogs make a daring escape into the English countryside, where they befriend a red fox who helps them survive in the wild. But as rumors circulate that the dogs may have been the test subjects for biological weapons and could be carrying a terrible plague, they soon find themselves targets of a great dog hunt. Local farmers, politicians, scientists, and even the military join in the search to track them down. An unforgettable tale of fantasy and adventure, a powerful exploration of the limits of human cruelty and kindness, The Plague Dogs stands as a modern-day classic.

"Thousands and thousands of people will love this book!" THE BOSTON GLOBE A lyrical, engrossing tale, by the author of WATERSHIP DOWN, Richard Adams creates a lyrical and engrossing tale, a remarkable journey into the hearts and minds of two canine heroes, Snitter and Rowf, fugitives from the horrors of an animal research center who escape into the isolation--and terror--of the wilderness.

Two dogs, Snitter and Rowf, escape from a research laboratory in the Lake District where it is wrongly supposed they have been purposely infected with a deadly virus and now pose a dangerous threat to the human population. As the authorities give chase, the two friends make their way through the hills and across the moors, along the way learning to survive on their wits and finding friendship and help from a fox they encounter. They dream of finding their original owners and a safe haven - but the hunt is on. A lyrical and engrossing tale, The Plague Dogs is a remarkable journey into the hearts and minds of two canine heroes.

A large black mongrel named Rowf and a white terrier named Snitter escape from an animal experiment center in England's Lake District and, aided by a cunning fox, learn to live on their own, until rumors of slaughtered sheep and bubonic plague-carrying dogs transform them into fugitives. Reprint. 15,000 first printing.

Richard Adams, author of 'Watership Down' and described recently as a legend of literature, was born in Newbury in 1920 as the replacement for a baby brother who died in the great influenza epidemic of 1917-19. His mother was well over 40 at the time of his birth, and his was a solitary childhood spent in a large garden. Here he explains how his days spent watching bird, beetles and wild creatures around his home engendered in him a lifelong love of nature. His years at prep and public school, at Oxford and in the army are all vividly described, and their influence on the recurrent themes in his writing of battle, leadership, friendship, bullying, solitude and longing made plain.

Richard Adams's Watership Down was a number one bestseller, a stunning work of the imagination, and an acknowledged modern classic. In Shardik Adams sets a different yet equally compelling tale in a far-off fantasy world. Shardik is a fantasy of tragic character, centered on the long-awaited reincarnation of the gigantic bear Shardik and his appearance among the half-barbaric Ortelgan people. Mighty, ferocious, and unpredictable, Shardik changes the life of every person in the story. His advent commences a momentous chain of events. Kelderek the hunter, who loves and trusts the great bear, is swept up by destiny to become first devotee and then prophet, then victorious soldier, then ruler of an empire and priest-king of Lord Shardik—Messenger of God—only to discover ever-deeper layers of meaning implicit in his passionate belief in the bear's divinity.

Two dogs, a fox terrier and a black Labrador, escape from a research laboratory in the Lake District. They team up with a fox and live wild. When it is discovered that the dogs may be carriers of bubonic plague, they are hunted down remorselessly.

South Africa, rabies has been on the rise since the latter part of the twentieth century despite the availability of postexposure vaccines and regular inoculation campaigns for dogs. In *Mad Dogs and Meerkats: A History of Resurgent Rabies in Southern Africa*, Karen Brown links the increase of rabies to the HIV/AIDS epidemic. Her study shows that the most afflicted regions of South Africa have seen a dangerous rise in feral dog populations as people lack the education, means, or will to care for their pets or take them to inoculation centers. Most victims are poor black children. Ineffective disease control, which in part depends on management policies in neighboring states and the diminished medical and veterinary infrastructures in Zimbabwe, has exacerbated the problem. This highly readable book is the first study of rabies in Africa, tracing its history in South Africa and neighboring states from 1800 to the present and showing how environmental and economic changes brought about by European colonialism and global trade have had long-term effects. *Mad Dogs and Meerkats* is recommended for public health policy makers and anyone interested in human-animal relations and how societies and governments have reacted to one of the world's most feared diseases.

Chronicles the canine rabies outbreak which, since 1988, has inflicted considerable human suffering in Texas, and describes the politics and side issues which have inhibited institution of an effective rabies vaccination program
