The Model CVGF chiller is ideal for office, hospital, school, hotel, retail store and industrial buildings. The Trane centrifugal chiller line offers hundreds of individual evaporator- condenser-compressor combination selections, permitting precise tailoring of the machine capacity to system requirements.

* A broad range of disciplines—energy conservation and air quality issues, construction and design, and the manufacture of temperature-sensitive products and materials—is covered in this comprehensive handbook * Provide essential, up-to-date HVAC data, codes, standards, and guidelines, all conveniently located in one volume * A definitive reference source on the design, selection and operation of A/C and refrigeration systems

The leading green building reference, updated with the latest advances in the field Sustainable Construction is the leading reference for the design, construction, and operation of high performance green buildings. With broad coverage including architecture, engineering, and construction, this book nevertheless delivers detailed information on all aspects of the green building process, from materials selection to building systems and more. This new fourth edition has been updated to reflect the latest codes and standards, including LEED v4, and includes new coverage of carbon accounting. The discussion has been updated to align with the current thinking on economics, climate change, net zero buildings, and more, with contributions by leaders in the field that illustrate the most recent shifts in thinking and practice. Ancillary materials including an instructor's manual and PowerPoint presentations for each chapter help bring this clear and up-to-date information into the classroom, making this book a valuable reference for working construction professionals. Also, Interactive graphics found throughout the course help activate the content and highlight key concepts for students. Sustainable construction has gone mainstream, and will one day be the industry norm. This book provides a comprehensive reference to all aspects of a project to show you how green building concepts and principles apply throughout the design and construction process. Get up to date on the latest green building codes and standards Learn about the newest technology in green building materials Adopt the best practices in procurement and delivery systems Apply sustainability concepts to all aspects of construction and design Green buildings operate at a very high level of efficiency, which is made possible only by careful consideration every step of the way. Appropriate land use, landscaping, construction materials, siting, water use, and more all play a role in a structure's ultimate carbon footprint. Sustainable Construction provides clear guidance for all aspects of green building, including the most recent advances and the latest technology.

In April 1609, King Philip III of Spain signed an edict denouncing the Muslim inhabitants of Spain as heretics, traitors, and apostates. Later that year, the entire Muslim population of Spain was given three days to leave Spanish territory, on threat of death. In a brutal and traumatic exodus, entire families and communities were obliged to abandon homes and villages where they had lived for generations, leaving their property in the hands of their Christian neighbors. In Aragon and Catalonia, Muslims were escorted by government commissioners who forced them to pay whenever they drank water from a river or took refuge in the shade. For five years the expulsion continued to grind on, until an estimated 300,000 Muslims had been removed from Spanish territory, nearly 5 percent of the total population. By 1614 Spain had successfully implemented what was then the largest act of ethnic cleansing in European history, and Muslim Spain had effectively ceased to exist. Blood and Faith is celebrated journalist Matthew Carr's riveting chronicle of this virtually unknown episode, set against the vivid historical backdrop of the history of Muslim Spain. Here is a remarkable window onto a little-known period in modern Europe—a rich and complex tale of competing faiths and beliefs, of cultural oppression and resistance against overwhelming odds.

Julie Clinton, author, speaker, and president of Extraordinary Women, has spoken to thousands of women across the nation and knows they are eager to break through ordinary busyness, discouragement, and distraction to embrace a meaningful life in Christ. With a practical, engaging 10-week format, Julie encourages women to experience this transforming life in and with Christ as she leads them to know God by spending time with Him and seeking His heart. Biblical and motivating, Julie awakens readers to inspired principles and life-changing priorities as they gather these and other riches of extraordinary faith: Refueled purpose and passion for their journey Healing of and release from past wounds Freedom from guilt with love and grace Relationships and connections that matter This exploration of God's Word and His desire for each woman's life reveals the remarkable, attainable picture of the godly significance she is made for. This book's content can be enhanced by the companion DVD.

The theory of price and quality decision-making in industries with a few firms which recognize their mutual interdependence is of increasing interest to economists and policy makers. This book introduces a novel theory of that decision-making, based upon the notion of the industry as a community of agents who are involved in both competitive and cooperative relationships. It develops theories and illustrates methodological approaches to the analysis of price and quality decision-making in such instances of a 'rivalrous consonance of interests' among firms.

This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it. This work is in the public domain in the United States of America, and possibly other nations. Within the United States, you may freely copy and distribute this work, as no entity (individual or corporate) has a copyright on the body of the work. Scholars believe, and we concur, that this work is important enough to be preserved, reproduced, and made generally available to the public. To ensure a quality reading experience, this work has been proofread and republished using a format that seamlessly blends the original graphical elements with text in an easy-to-read typeface. We appreciate your support of the preservation process, and thank you for being an important part of keeping this knowledge alive and relevant.
