valuation of parafiction as a critique of realism; from Lisa Hsieh's examination of modernology in Japan to Cynthia Davidson's conversation with Martino Stierli, *Log 41* considers both history and the contemporary. In *Working Queer*, nineteen authors take a similar look at history and the contemporary in articles ranging from homo-fascism in early 20th-century aesthetics to trans gender bathroom typologies for today, as well as methods of work, materials, and mediation that can all be considered queer, or queering, in our pluralist, mediated world.

'Scarface' is a powerful, stylized commentary on violence, materialism, excess, corruption and crime in America. Set during the drug-driven decadence of Miami in the 1980's, it is a rags to riches story about the rise and fall of an illegal immigrant from dishwasher to narcotics kingpin who is undone by greed and delusions of grandeur triggered by cocaine psychosis. It is both thrilling entertainment and a wicked, nightmarish parody of the American dream. 'Scarface: The Ultimate Guide' places the movie in its historical context and examines its origins, development, production, release, critical reception and current status in the culture. The highlight of the book is a detailed analysis of the movie from first frame to FADE OUT. ""Chi-Chi. Chi-Chi. Get the yeyo.""

On 12 October 2010 the world's attention was fixed on a remote copper mine in the Atacama desert in Chile. Final preparations were underway for a daring rescue to bring to an end the longest underground entrapment in human history. 69 days earlier, 33 men were midway through a routine shift, deep in the San Jose mine. They stopped for their lunch break at the tiny safety shelter, 688 meters below the surface. Ten minutes later they heard an almighty crack and a deep rumbling sound. Clouds of dust and debris poured down on the choking men. The bombardment lasted for five hours. When it finally cleared the men began to explore the 6km of underground tunnels, caves and dead ends - only to discover they were trapped under tonnes of collapsed rock. They survived on the most meagre of rations believing an attempt to rescue them was underway: a spoonful of tuna fish and a half glass of milk every 48 hours. But as days turned to weeks, hope began to fade and as starvation set in, they prepared for a slow and agonizing death. 17 days after the collapse a drill

finally reached them, they sent a note back to the surface: 'all 33 of us are well inside the shelter'. Now a 700 meter-long tunnel, the width of an orange connected them to the surface. Above ground at 'Camp Hope' the rescue team now included hundreds of geologists, engineers, psychologists, as well as the families of the men. Three separate rescue missions were launched, but hit one setback after another. 10 weeks after the collapse, and with the world watching, all 33 men would be brought safely to the surface. The 33 is the remarkable story of their 10-week incarceration, half a mile below the surface - and the epic rescue mission which finally brought them back to life.
